

Instructions

1. Print a copy of this brochure
2. Download the plant identifier to your phone for reference

<https://tinyurl.com/32cky6jn>

3. Choose your trail
4. Walk slowly and pay attention to the plants you see
5. Mark off the relevant box when you spot and identify one of the plants (they are all verified in the location)
6. Add your own notes to your observations
7. (Optional: add your observations to the iNaturalist app)

A map of Kangerlussuaq showing the trail.

It is 1.6 km in total length.

The route is accessible to all people.

You can extend the route by continuing towards Old Camp along the Marius Olsen-ip Aqq, and returning along the full length of Narsaviaq Aqq.
